

mk EM Security Gates

Reliable 3-D Detection

Benefits for your library:

- Reliable and patented 3-D detection technology ensures detection at virtually any label orientation
- With a detection accuracy rate of over 90%, mk EM Security Gates shatter the traditional EM detection barrier
- Detects labels located on metal surfaces or even inside aluminum material.
- Attractive designs, available in various colors and materials.
- Distance between gate pedestals provide comfortable width for wheelchairs and stroller
- Integrated light and audible alarms
- Compatible with existing security systems from 3M, Gateway, Sentry, Certus, Dialoc and CP Meto.
- Easy configuration available to reduce false alarms without the need of additional sensors

Technical Details:
